***Allowable Subject Matter***

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance: With respect to independent claim 1, the cited prior art does not anticipate or make obvious, *inter alia*, wherein in the annealing the silicon wafer is subjected to temperature heat-up in a mixed gas atmosphere having a ratio of hydrogen gas to an inert gas of 5% to 100% so as to remove the boron-containing native oxide film, and subsequent annealing in an inert gas atmosphere and a boron concentration in the wafer surface and a boron concentration in the bulk silicon are made to be substantially same by the annealing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
